TOGETHER, WE CAN DELIVER.

SEPTEMBER — OCTOBER 2015

## Prescott Meals On Wheels Annual Report 2014-2015

Prescott Meals On Wheels has been in service to the Prescott community since 1973. Our fiscal year runs from July 1 to June 30. Prescott Meals On Wheels is not a government agency. We are a 501(c)3 nonprofit. With your investment in our mission we were able to provide the following support to some of our community's most vulnerable citizens.

- 47,746 home delivered meals were served
- 10,920 or just 32% of home delivered meals were paid for by the Area Agency on Aging out of a total of 33,686 meals served to all home-bound seniors and the disabled referred to Prescott Meals On Wheels by the Area Agency on Aging
- 22,766 or 68% of the meals served to seniors and disabled individuals referred to us by the Area Agency on Aging were paid for by private donations - **Thank YOU!**
- 14,827 dining room meals were served
- 121 volunteers, on average, each month
- 16,881 hours of volunteer service were donated by community members
- 43,490 miles were driven to provide home delivered meals five days each week. (The equatorial circumference of the earth is 24,901 miles. Therefore, our volunteer drivers collectively circle the equator almost twice each year in the pursuit of providing a hot, nutritious meal.)

### The Mind/Body Connection

From Harvard Medical School News, information on groundbreaking research from the Institute for Mind/Body Medicine at Massachusetts General Hospital, Dr. Herbert Benson, Director

A new study from the investigators at the Bensen-Henry Institute for Mind/Body Medicine finds that eliciting the relaxation response—a physiologic state of deep rest induced by such practices such as meditation, yoga, deep breathing, and prayer—produces immediate changes in the expression of genes involved in immune function, energy metabolism, and insulin secretion. "Many studies have shown that the relaxation response can reduce stress and enhance wellness in healthy individuals and counteract the adverse effects of stress like hypertension, anxiety, diabetes, and aging," said Herbert Bensen MD, co-author of the report. "Now for the first time we've identified the way through which these benefits might be induced."

To read more, go to the Harvard Medical School website - <https://hms.harvard.edu/news>. For the Bensen-Henry institute go to <https://www.bensenhenryinstitue.org>

### Seven Steps to evoke the relaxation response as created by Harvard Medical School

1. Pick a focus word or short phrase to repeat
2. Sit quietly in a comfortable position with your eyes closed
3. Relax your muscles
4. Breathe slowly and naturally. As you exhale, repeat your focus word or phrase silently to yourself.
5. When other thoughts come to mind, say to yourself "Oh well", and gently return to the repetition
6. Continue for 10 to 20 minutes
7. Sit quietly for a minute or two, allowing other thoughts to return. Then open your eyes and sit for another minute before rising.
